2022 Marlborough Sauvignon Blanc

The 2022 vintage may be considered one of the more challenging in recent memory, with crops recovering from the very low 2021 season. A second “La Nina” year delivered warm waters around our coastal vineyard in the Awatere Valley Marlborough, and this translated to a warm settled flowering period in late November and December 2021. A warm and dry finish enabled the harvest team to bring in the fruit with full ripe flavours and refreshing acidity.
